

22nd International Toki Conference
“Cross-Validation of Experiment and Modeling for Fusion and Astrophysical Plasmas”
Ceratopia Toki, Toki-city, Gifu, JAPAN, November 19-22, 2012

Second Announcement

1. Introduction

The International Toki Conference (ITC) is an international conference for the presentation and discussion of research activities related to nuclear fusion and plasma sciences. It has been held annually by the National Institute for Fusion Science in Toki City since 1989.

2. Objectives

The purpose of this year’s conference is to discuss the validation of theoretical models and simulations by experiments and the interpretation and prediction of experimental data by models. It covers mutual-interaction of theory/simulation and experiment/observation in fusion and astrophysical plasmas. Development of new diagnostics, atomic processes and scientific visualization are also covered.

3. Topics

Topical areas of interest include:

- (1) Validation of modeling in fusion research
- (2) Numerical simulation and observation in astrophysical plasmas
- (3) Transport (modeling, experiment and observation)
- (4) Reconnection (theory, simulation, experiment and observation)
- (5) Interaction between energetic particles and waves in plasmas
- (6) Plasma-wall interaction (modeling, experiment and observation)
- (7) Plasma diagnostics for cross-validation
- (8) Atomic processes in laboratory and astrophysical plasmas
- (9) Scientific visualization

4. Meeting format

The meeting will consist of invited and contributed oral presentations, poster sessions, and a summary session. The abstracts will be selected by the Program Committee as either oral or poster presentations. A LCD projector with a laptop personal computer (PC) will be available for participants to present their papers. Power Point or PDF formats are recommended. The official language of the meeting is English.

A tentative time table of the scientific program is as follows:

5. Publications

5.1. Booklet of Abstracts

A printed booklet of abstracts of invited and contributed presentations will be distributed to participants at the meeting desk. Abstracts also will be available on the meeting website.

5.2. Journal Publication

The papers presented in the conference can be submitted to Plasma and Fusion Research (<http://www.jspf.or.jp/PFR/>) which is an electronic journal published by the Japan Society of Plasma Science and Nuclear Fusion Research. The papers will go through a complete peer-review process. Only the papers reporting original and previously unpublished work will be accepted and published as regular articles in the academic journal, PFR. Papers which do not contain original work will be accepted as "Overview articles" in PFR. The maximum length of the manuscript should be 8 pages for Plenary and Invited talks, and 4 pages for Contributed papers in the PFR format. A submission fee (Article charge: 3,000 JPY + Page charge: 5,000 JPY/page) is required for publication. The submission fee and reprint fee are NOT included in the registration fee.

6. Registration

6.1. Registration

The principal author must be a conference registrant. All registrations (other than abstract submission) will be made through the conference web site (<http://itc.nifs.ac.jp/>). All attendees are requested to register

by October 1, 2012.

6.2. Registration fee

The registration fee is 20,000 JPY (15,000 JPY for students). The registration fee includes:

- (1) Access to all sessions of the scientific program
- (2) An abstract booklet
- (3) Coffee break refreshments
- (4) Conference banquet

The registration fee is payable at the conference site (only by cash in Japanese yen).

*Note: Payment of the banquet fee is mandatory regardless of attendance, however a separate receipt for the registration fee excluding the banquet fee can be obtained on request.
