TABLE OF CONTENTS

ABSTRACT	1
EDITORIAL	1
TABLE OF CONTENTS	1
PREFACE	3
EXECUTIVE SUMMARY	5
1. INTRODUCTION	6
1.1. The history of the Commission	6
1.2. The development of the Commission's recommendations	6
1.3. Structure of the Recommendations	10
2. THE AIMS AND SCOPE OF THE RECOMMENDATIONS	12
2.1. The aims of the Recommendations	12
2.2. The structure of the system of protection	13
2.3. The scope of the Recommendations	16
2.4. Exclusion and exemption	17
3. BIOLOGICAL ASPECTS OF RADIOLOGICAL PROTECTION	19
3.1 The induction of tissue reactions (deterministic effects)	19
3.2 The induction of late-expressing health effects of radiation (stochastic effects)	20
3.3 The induction of diseases other than cancer	27
4. QUANTITIES USED IN RADIOLOGICAL PROTECTION	28
4.1. Introduction	28
4.2. Considerations of health effects	28
4.3. Dose quantities	29
4.4. Assessment of radiation exposure	37
4.5. Uncertainties and judgements	43
5. THE SYSTEM OF RADIOLOGICAL PROTECTION OF HUMANS	45
5.1. The definition of a source	46
5.2. Types of exposure situations	46
5.3. Categories of exposure	47
5.4. The identification of the exposed individuals	48
5.5. Levels of radiological protection	50
5.6. The principles of radiological protection	51
5.7. Justification	52
5.8. Optimisation of protection	54
5.9. Dose constraints and reference levels	57
