ご招待状を出したい。

Ha Noi, January 28, 2002

Dear Mr. Mori,

At the invitation of the JAIF, during the last November and December, two Vietnamese high-ranking officials missions had paid visits to Japan aimed at studying nuclear power generation and its technologies. Those were good opportunities for us to visit nuclear power stations and other nuclear-related facilities, as well as to get helpful information on advanced nuclear power technologies of your country.

It was regretful that due to time constraints, we were not able to visit the Ministry of Economy, Trade and Industry (METI) and the headquarters of the electric utility companies in order to discuss with Japanese counterparts the issues related to nuclear power development in Viet Nam.

As you may know, in order to successfully implement nuclear power generation in Vietnam, we have to refer to the experiences of the leading nuclear power countries, including Japan, in all aspects related. We, therefore, would be very happy if Japanese experts visit Vietnam to exchange the lessons

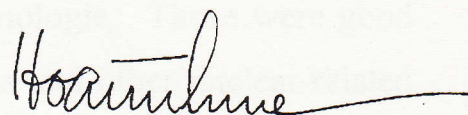

and experiences on nuclear power development in Japan. At present, our interest is on the position of nuclear power generation in the Japanese energy policy, nuclear technologies and nuclear safety management, treatment of radioactive wastes, control and operation of nuclear power plants.

In this connection, I would like to extend my invitation to you and the representatives from the METI and relevant companies of Japan to visit Viet Nam on the earliest occasion to share your thoughts and experiences with Vietnamese officials, managers and scientists.

One again, I would like to express our sincere appreciation for your hospitality and excellent arrangement during our missions in Japan last year.

I look forward to having a favorable reply from your soon.

Sincerely yours,

Hoang Van Huay
Vice Minister of the MOSTE
