Dear Mr MORI,

Thank you very much for our meeting and for the lunch we had in Tokyo. I was so interested and honoured to hear your point of view about enrichment processes.

It appears that we share a common interest on the AVLIS process in a long term view. A further exchange with Laser-J, until 2003, comparing some of our results with respect to technical orientations, could probably improve the knowledge on both sides. I told Mr MORIOKA that we could for instance stay in touch in April. Then the idea of a common workshop on the AVLIS process, when our experimental programs will be over, is maybe to develop.

Sincerely yours,

Gilles BORDIER
