Attn : Miss Kojima

Dear Sir,

June 12, 2003

Reference is made to your letter of February 12, 2003, by which you kindly permitted us to translate "Hydrogen Energy by Nuclear Energy."

Some days age, my people sent five copies of the translated version of your book to you, thanking you and expecting to have continued cooperation with you. The translator said that one or two Chinese characters used in the references of the book are not available in Korean computer so that such word(s) has no not been correctly published in the translated copy, for which we feel sorry.

By using this text, our people will start another seminar on "Nuclear Hydrogen." It is our hope that we will establish a kind of Nuclear Hydrogen Study Group, as Japanese pioneers did in the past.

Again thanking you for your hospitality shown to us, we remain.

Sincerely yours,

cc : Dr. J. H. Chang
