## Contents

I.	National Institute for Fusion Science in April 2003 – March 2004.....	1
II.	Research Activities .....	3
	1. Large Helical Device (LHD) Project .....	3
	1-1. LHD Experiment .....	3
	(1) Overview of LHD Experiment .....	3
	(2) LHD Physics Experiments .....	5
	§1. High $W_p$ Operation in LHD .....	5
	§2. Density Limit Studies in LHD .....	6
	§3. Confinement Property of Gas-Fuelled High-Density LHD Plasmas .....	7
	§4. Boronization and High Density Plasmas.....	8
	§5. Influence of Wall Recycling on the Thermal Stability and Density Limit ...	9
	§6. Extended International Stellarator Confinement Database and a Provisional Scaling of Energy Confinement Time.....	10
	§7. New LHD Confinement Scaling Laws for NBI-Heated Gas-Puffing Plasmas on LHD .....	11
	§8. Comparison of Confinement Degradation in High Density and Particle Transport between Tokamak and Helical .....	12
	§9. Experimental Reconstruction of Helical Plasma Equilibria in LHD .....	13
	§10. Reduction of Electron Heat Diffusivity Induced by Edge Cooling on LHD.....	14
	§11. Observation of Nonlocal Electron Temperature Rise in the LHD Plasma Right after a Tracer-Encapsulated Solid Pellet Injection .....	15
	§12. Electron Heat Transport Study by MECH in NBI Plasmas .....	16
	§13. $\beta$ Dependence of MHD Activities in LHD .....	17
	§14. Magnetic Axis Shift in Finite Beta Plasma of LHD .....	18
	§15. The Effect of the Elongated Configurations on Shafranov Shift .....	19
	§16. The Effect of Net Toroidal Current on Shafranov Shift .....	20
	§17. Measurement of Pressure Profile and Pressure Anisotropy by Magnetic Measurements .....	21
	§18. Behavior of Toroidal Current and Other Plasma Parameters in Termination of Discharges in LHD.....	22
	§19. Comparative Study of MHD Instabilities in LHD and JT-60U – Instability at $t=0.5$ during Counter-NB – .....	23
	§20. Configuration Dependence of Energetic Ion Driven Alfvén Eigenmodes in the Large Helical Device.....	24
	§21. Confinement and MHD Stability of a Plasma in a New Magnetic Configuration with Very Low Rotational Transform.....	25
	§22. Observation of Doublet Equilibrium in LHD .....	26
	§23. Experiments of Magnetic Island Formation.....	27
	§24. Bifurcation of Equilibria with and without a Large Island in the LHD .....	28
	§25. Development of Magnetic Island in the Strongly Inward Shifted Configuration.....	29
	§26. Measurement of Magnetic Field Accompanied by Varying Magnetic Island in LHD.....	30
	§27. Estimation of Island Width by Magnetic Diagnostics in LHD .....	31
	§28. Observation of Magnetic Field for Disappearance of Magnetic Island in LHD .....	32
	§29. Electron Temperature Profiles with Bulged Regions around the $t=1$ Magnetic Surface .....	33

§30.	Control of the Radial Electric Field Shear by Modification of the Magnetic Field Configuration in LHD .....	34
§31.	Transition Characteristics to High-Te-State by Additional ECH on NBI Sustained Plasmas .....	35
§32.	Electron Heat Transport Study by MECH in EC Heated High Temperature Plasmas.....	36
§33.	Analysis of the Radial Electric Field (Electron Root) and its Impact on Plasma Confinement in LHD .....	37
§34.	Study on Electron Heating and Current Drive by Electron Bernstein Waves.....	38
§35.	Electron Cyclotron Current Drive near the First Harmonic ECR Using Ordinary Waves .....	39
§36.	Optimization of Incident Wave Polarization for ECRH Using 82.7 and 84GHz System .....	40
§37.	High-Ion Temperature Experiments with High-Z Plasmas in LHD .....	41
§38.	Edge Plasma Control by LHD.....	42
§39.	Particle Flux Profiles on the LID Head.....	43
§40.	Relationship between Magnetic Field Structure and Plasma Density Profile in LHD Edge Region .....	44
§41.	Characterization of the LHD Edge & Divertor Plasma by Ion Sensitive Probe Measurement.....	45
§42.	Remote Experiments on Measurement of Edge Plasma Fluctuation in LHD with Super SINET .....	46
§43.	Measurement of Space Potential Fluctuation in Edge Plasma of the LHD by Using Emissive Probe made of Carbon Material.....	47
§44.	Fluctuation Measurements by Using Microwave Reflectometer .....	48
§45.	H-Mode-Like Discharge under the Presence of 1/1 Rational Surface at Ergodic Layer in LHD.....	49
§46.	Experimental Study of Particle Transport on LHD.....	50
§47.	Penetration Depth of Solid Hydrogen Pellets in LHD Plasmas.....	51
§48.	Three-Dimensional Observation of the Pellet Ablatant Using Stereography .....	52
§49.	Spectroscopic Analysis of Hydrogen Ice Pellet Ablation.....	53
§50.	Particle Confinement Analysis Using the Ice Pellet Injection .....	54
§51.	Analysis of the Accelerated Proton Trajectory by ICRF Waves during Long Pulse Discharges .....	55
§52.	Fully Three-Dimensional Simulation of Neutral Particle Transport in an ICRF Heated Long Pulse Discharge .....	56
§53.	Dependence of Impurity Accumulation Window on Magnetic Configuration.....	57
§54.	Injection and Transport Study of High Z Noble Gases.....	58
§55.	A Study of Charge Dependence of Impurity Transport on LHD.....	59
§56.	Edge Plasma Behavior and Neutral Particle Transport Analysis in Non-Axisymmetric Plasmas.....	60
§57.	$Z_{eff}$ Dependence of Neutral Beam Current Drive in LHD.....	61
§58.	Evaluation of Energetic Particle Confinement Using CXNPA Diagnostics on LHD.....	62
§59.	Development of New Analytical Method for Energetic Particle Confinement Using CXNPA Diagnostics.....	63
§60.	Parameter Dependence of the Resonant Loss .....	64
§61.	Observation of High Energy Neutral Beam Attenuation by Doppler Spectroscopy .....	65

§62.	Velocity Spectrum for the LHD-Neutral Beam Injector Beam .....	66
§63.	Operational Archives of NBI-BL3 in 7th Experiment Campaign .....	67
§64.	Measurement of Pitch Angle of Magnetic Field Using Motional Stark Effect (MSE) Spectroscopy .....	68
§65.	Measurements of Plasma Rotation by Using Fast Charge Exchange Spectroscopy System .....	69
§66.	Compact Neutral Particle Analyzer for Wide-Range Passive and Active Charge Exchange Measurements .....	70
§67.	Spectroscopy of Extreme Ultraviolet Emissions from LHD Plasmas for Detailed Atomic Modeling.....	71
§68.	Operational Density Range and Radiation Fraction in NBI and ICH Long Pulse Discharges.....	72
§69.	ECH CW Experiment.....	73
§70.	Erosion and Deposition of Carbon on the Divertor Tiles and the First Wall in LHD.....	74
§71.	Evaluation of Modification and Damage of Plasma Facing Surface of LHD .....	75
§72.	Retention and Desorption of Hydrogen and Helium in Stainless Steel Wall.....	76
§73.	Study on Generation Mechanism of Carbon Particles Induced by Hydrogen Plasma Wall Interaction.....	77
§74.	Analyses of Boronized Walls and Operation Scenario in LHD.....	78
§75.	Surface Probe Analysis for Boronized Wall of LHD.....	79
§76.	Comparison and Study of Large Fusion Devices for Optimization of the Boronization Methods.....	80
(3)	LHD Device Engineering Experiments.....	81
§1.	Observation of Magnetic Field with Very-Long Time Constants in LHD Poloidal Coils.....	82
§2.	Measurement of Residual Magnetic Field by LHD Superconducting Magnets.....	83
§3.	Measurement of Acoustic Emission Signals from the LHD Helical Coils...	84
§4.	State Estimation of Large Superconducting Magnet Using AE Technology and Fuzzy Theorem.....	85
§5.	Strain Measurement of Cryogenic Support Structure LHD.....	86
§6.	Temperature Differences in Parallel Cooling Paths for the Supporting Structure of the LHD.....	87
§7.	Current Control of Superconducting Coils for LHD – Interaction between Control System and Plasma Current – .....	88
1-2.	Device Engineering and Cooperative Development Research.....	89
(1)	Physics and Engineering of LHD Torus System.....	89
§1.	R&D of Surface-Boltless Mechanically Attached Divertor Plate for LHD..	90
§2.	Development and Temperature Control of Ceramics Divertor Plates .....	91
§3.	Behavior of Rhenium Interface on Tungsten Coated Carbon by Heat Load.....	92
§4.	Retention Characteristics of Boron Thin Films under High Flux Ion Irradiation.....	93
§5.	Effect of Carbidization on Hydrogen Absorption Capability of Niobium Pumping Panel .....	94
§6.	Mechanism of Hydrogen Pumping by Nb Membrane under Sputtering .....	95
§7.	Development of Supersonic Molecular Beam Source for Fueling .....	96
§8.	Behavior of Ice Pellet in Drift Tube.....	97
§9.	Study of the Fueling Pellet Transportation in the Guiding Tube .....	98

(2) Applied Superconductivity and Cryogenics .....	99
§1. Phase Transition to Subcooled-He I on a Stabilizer Cooled with He II <sub>p</sub> .....	100
§2. Study on Long Loops with Long Time Constants in Cable-in-Conduit Superconductor .....	101
§3. The Method to Reduce AC Losses in Stable Superconducting Pulse Coils .	102
§4. Studies on Transient Heat Transport Characteristics of Fountain Effect for an Improvement in Cooling Performance of Superconducting Magnets .....	103
§5. Research and Development of New Intermetallic Compound Superconductors .....	104
§6. Analysis of Helium Bubbles Motion in Liquid Helium for the Evaluation of Cryogenic Stability in Superconducting Magnet, .....	105
§7. Development of Strength Evaluation Methods of Material Systems for Superconducting Fusion Magnets .....	106
§8. Fundamental Study on Cryogenic Characteristics of SiC Power Device and Its Application to AC/DC Converter .....	107
§9. Visualization Study of the Heat Transport in Pressurized Super Fluid Helium .....	108
§10. Tensile and Bending Mechanical Properties of Bulk Superconductors .....	109
§11. Database for Design of Superconducting Magnet Systems with He II Cooling .....	110
§12. Electromagnetic Stress and Coupling Loss in Superconducting Cable .....	111
§13. Composite Electrical Insulation and its Reliability at Cryogenic Temperature for LHD .....	112
§14. Study on Electrical Insulation under Practical Condition of a Superconducting Coil Operation .....	113
§15. Fundamental Study on Application of Magnetic Levitation Using YBCO Bulk Superconductor to Fusion Research .....	114
§16. Design of a 7-T Force-Balanced Helical Coil .....	115
§17. Basic Research on the Conduction-Cooled Oxide Superconducting Magnet wound with Parallel Conductors .....	116
§18. Study on Optimization of High Temperature Superconducting Magnet .....	117
§19. Development of UPS-SMES as a Protection from Momentary Voltage Drop .....	118
§20. Improvement in the Cryogenic Stability of the Model Coil of the LHD Helical Coil by Lowering the Temperature .....	119
§21. Thermal Contraction Characteristic of SC Bus-Lines for LHD .....	120
§22. Thermal Contact Conductance between the Bundle and the Conduit in Cable-in-Conduit Conductors .....	121
§23. Asymmetrical Normal-Zone Propagation in the Al-Stabilized Superconductor for the LHD Helical Coils .....	122
§24. Excitation Characteristics of the HTS Floating Coil of the Mini-RT Device .....	123
§25. Line Voltage Detector for SMES System Designed to Protect from Momentary Voltage Drop .....	124
§26. Design Study of HTS Current Lead Using Bi-2212 Prepared by Diffusion Process .....	125
§27. Evaluation Technique on Thermal Impedance between Dissimilar Solids ..	126
§28. Dynamic Simulation of a Helium Liquefier .....	127
§29. Studies on Thermal Characteristics of Superconducting Coil Cooled by Subcooled He I .....	128
§30. Losses in Lap Joints during Pulsive Energizations .....	129

§31.	Non-Uniform Current Distributions and Large Time Constant Inter-Strand Coupling Losses in Cable-In-Conduit Conductors .....	130
§32.	Stability Test of Cable-In-Conduit Type SMES Conductor by Inductive Heating .....	131
(3)	Plasma Heating Systems.....	132
§1.	CW ECH Operation .....	133
§2.	Dealing with Temperature Increase of Waveguide for CW-ECH Power Transmission .....	134
§3.	Alignment Method of ECH Transmission Lines Based on the Moment and Phase Retrieval Methods Using IR Images.....	135
§4.	Verification of Branch Structure in a Remote Steering Antenna.....	136
§5.	Three-Dimensional Calculation Analysis of ICRF Heating in LHD.....	137
§6.	Improvement of ICRF Antennas .....	138
§7.	Status of Negative-Ion-Based Neutral Beam Injection System of LHD.....	139
§8.	Improvements of a Negative Ion Source with Multi-Slot Grounded Grid....	140
§9.	Collection of Beam Profile by Modifying Aperture Shape of Steering Grid .....	141
§10.	Simultaneous Operation of Compact Cesium Hollow Cathodes in 1/3 <sup>rd</sup> scale H-Source .....	142
§11.	Cs Consumption of LHD-NBI H-Ion Source.....	143
§12.	Comparison between Retrieved and Measured Phase Profiles of Quasi-Optical Beams .....	144
§13.	Preliminary Test Results on Remote Steering Antenna at Low Power Level.....	145
§14.	Development of a Millimeter Wave Transmission Mirror for Axi-Symmetric Heating over a Wide Cross Section .....	146
§15.	Development of Multi-Antenna rf Ion Source .....	147
§16.	Development of High Density Negative Ion Source by Helicon Wave.....	148
(4)	Diagnostic Systems .....	149
§1.	Long Term Performance of a Composite Large Scale Mirror for Collecting Thomson Scattered Light .....	150
§2.	Developments of Two Color YAG/CO <sub>2</sub> Laser Imaging Interferometer on LHD.....	151
§3.	2D-Phase Contrast Imaging of Turbulence Structure on LHD.....	152
§4.	Electron Density Profile Measurements along the Minor Axis in the Horizontally Elongated Plasma Using Ultrashort Pulsed Radar Reflectometer .....	153
§5.	Development of a 6MeV HIBP for the LHD Plasma .....	154
§6.	Development of the New Energy Analyzer for MeV Range Heavy Ion Beam Probes.....	155
§7.	Injection of the Probing Beam for a Heavy Ion Beam Probe on LHD .....	156
§8.	Characteristics of Au <sup>-</sup> Beam Source for a Heavy Ion Beam Probe of the LHD.....	157
§9.	Ultrasoft X-Ray Diagnostic for Impurity Transport Studies with Tracer-Encapsulated Solid Pellet Injection on LHD.....	158
§10.	Li-Like Fluorine Spectrum Observed from TESPEL Injection Experiments.....	159
§11.	Installation of the VUV Spectrometer "SPRED" for TESPEL Diagnostic ..	160
§12.	Relativistic Effects on Measurements of ECE in LHD Plasma .....	161
§13.	Study on High Energy Particles Escaped from LHD Using Scintillator Probe .....	162
§14.	Development of a New Two Color FIR Laser Interferometer .....	163

§15.	New THz Detection System Operating up to the 6 THz Rang .....	164
§16.	Study of High-Performance Array Antennas for Millimeter-Wave Imaging Array .....	165
§17.	Measurements of Fine Spectral Profile of H $\alpha$ in LHD Steady State Plasmas.....	166
§18.	Image Processing Study for Bolometer Tomography of LHD Plasma.....	167
§19.	Radial K $\alpha$ Profile of High Z Element Obtained with Pulse Height Analyzer in LHD .....	168
§20.	Development of the Combined Electron Cyclotron Emission (ECEI) and Microwave Imaging Reflectometer (MIR) System for LHD Plasmas Experiment .....	169
§21.	New World Record of Diagnostic Data Amount in Fusion Plasma Experiments.....	170
§22.	Video Delivery System for LHD Experiment Remote Participation.....	171
§23.	On the Performance of Retrieving Similar Waveforms .....	172
§24.	Tomographic Reconstruction for Tangentially Viewing 2-D Measurements .....	173
§25.	Observation of DED Induced Magnetic Islands in TEXTOR Tokamak .....	174
§26.	Performance Improvement of a Spherically Converging Ion Beam Colliding Fusion Neutron Source by Use of External Ion Sources .....	175
1-3.	Theoretical Study.....	176
§1.	A New Method Constructing Magnetic Flux Coordinate.....	177
§2.	Integration Formula of the Magnetic Field Produced by the Finite Size Helical Coil with Arbitrary Polygonal Cross Section.....	178
§3.	Healing of n=1 Magnetic Islands in LHD Equilibrium .....	179
§4.	Theoretical Considerations of Doublet-Like Configuration in Stellarators ..	180
§5.	Nonlinear Analysis for Stabilization of Interchange Mode in LHD Plasmas.....	181
§6.	Magnetic Island Generation in Nonlinear Evolution of Interchange Mode..	182
§7.	ICRF Heating of LHD Plasma Using Resonance Layers in Front of ICRF Antenna .....	183
§8.	Geometrical Effects on Pellet Ablation.....	184
§9.	Strike Point Pattern on Local Island Divertor Head.....	185
§10.	3D Edge Transport Study of LID Configuration in LHD with a Monte Carlo Scheme .....	186
§11.	MHD Equilibrium and Stability of Spherical Tokamak with Current Hole .....	187
§12.	Comparative Study for the Estimate of Effective Helicity in LHD – in Relation to Develop the Analysis of the Electron Root Physics in Helical Systems –.....	188
§13.	Theoretical Study of the Hysteresis for the Radial Electric Field in Helical Plasmas.....	189
§14.	Accessibility to a Double-Peaked $E_r$ Shear Layer Structure by Double Electrode Biasing in Tokamak Plasmas .....	190
§15.	Statistical Theory for Transition and Long-Time Sustainment of Improved Confinement State .....	191
§16.	A Novel Turbulence Trigger for Neoclassical Tearing Modes in Tokamaks .....	192
§17.	Effect of Sheared Flow on Microinstabilities and Transport in Plasmas.....	193
§18.	Effect of Magnetic Axis Shift on Neoclassical Transport in Helical Torus .	194
§19.	Temperature Gradient Driven Short Wavelength Modes in Sheared Slab Plasmas.....	195

§20.	Short Wavelength Temperature Gradient Ion Modes and Electron Temperature Gradient Modes in Sheared Slab Plasmas .....	196
§21.	Instability and Transport Driven by Electron Temperature Gradient Close to Critical.....	197
§22.	Magnetic Field Gradient and Curvature-Driven Drift Modes in Toroidal Plasmas.....	198
§23.	Interaction between the Trapped Electrons and Magnetic Field gradient and Curvature-Driven Drift Waves in the Toroidal Plasmas .....	199
§24.	Spectrum of the Velocity Distribution Function in the Slab Ion Temperature Gradient Driven Turbulence .....	200
§25.	Study of Electromagnetic Microinstabilities in Helical Systems.....	201
§26.	Collisional Effects on Coherent Structures of Zonal Flows and Turbulent Transport .....	202
§27.	On Flow Reversal in Turbulent Swirling Flow.....	203
§28.	Dynamos and MHD Theory of Turbulence Suppression.....	204
§29.	The Flierl-Petviashvili Equation and the Zonal Flow .....	205
§30.	The Range of Validity of the Rayleigh Hypothesis .....	206
1-4.	LHD Project Research Collaboration .....	207
§1.	Construction and Operation of the Internal Coil Device Mini-RT with an Levitation of a High Temperature Superconducting Coil.....	208
§2.	Cooling Stability Test of He II Cooled LHD Conductor .....	209
§3.	Dynamics of Hydrogen Isotopes in a Boron Coating .....	210
§4.	Retention and Desorption of Hydrogen and Helium in Stainless Steel Wall .....	211
§5.	Development and Synthetic Evaluation of High-Z Plasma Facing Materials.....	212
§6.	Technical Evaluation of SiC Ceramic-Based Plasma Facing Components ..	213
§7.	High Efficiency Gas Divertor Control by Molecular Associated Recombination Process .....	214
§8.	Investigation of Tritium Behavior at D-D Burning Experiment in LHD and Study on Recovery, Treatment and Disposal Methods of Tritium .....	215
§9.	Influence of Dissolved Gas Concentration on Subcooled Flow Boiling Critical Heat Flux in Short Vertical Tube .....	216
§10.	Environmental Behavior of Tritium and Biological Effects and Assessment of Tritium .....	217
§11.	Analysis of Helical Plasmas Using Distributed Parallel PC Cluster and Its Application to LHD.....	218
§12.	Development of Deuterium Negative Ion Sources and Its Database Construction .....	219
§13.	Characteristics of Charge Separation in a Slanted Cusp Field for Direct Energy Conversion.....	220
§14.	Development of a High Beta Plasma Formation Method Using the ICRF High Harmonic Fast Wave.....	221
§15.	Development of a Space and Time Resolving Soft X-Ray Polychromator ..	222
§16.	Ultra-Short Microwave Pulse for Plasma Diagnostics.....	223
§17.	Polarization Resolved $H_{\alpha}$ Spectra from the LHD: Emission Location, Temperature and Inward Flux of Neutral Hydrogen.....	224
§18.	Spectroscopic Diagnostics of High-Density Hydrogen Plasmas Interacting with a Graphite Plate .....	225
§19.	Effect of Vibrational Excitation of Molecular Hydrogen on Hydrogen Recycling in LHD Edge Plasma .....	226

§20.	Development of Powerful 57- and 48- $\mu\text{m}$ $\text{CH}_3\text{OD}$ Lasers for Two Colour FIR Laser Interferometer.....	227
2.	Collaboration on Fusion Engineering .....	228
(1)	Fusion Engineering Studies.....	228
§1.	Ion Irradiation Experiments on YAG Laser Welded V-4Cr-4Ti Alloy (NIFS HEAT-2) .....	229
§2.	Overall Characterization of High Purity Reference Vanadium Alloys NIFS-HEATs.....	230
§3.	Development of Fine-Grained, Particle Dispersed Vanadium Alloys with Improved Resistances to High-Temperature Deformation and Embrittlement by Neutron and Helium Irradiations .....	231
§4.	Effects of Impurities on the Behavior of Helium-Defect Complexes in Vanadium .....	232
§5.	Development of Reduced Activation Ferritic Steels with Improved Heat Resistance and Elemental Property Characterization for High Cycle Efficiency Steel-Based Blankets .....	233
§6.	Development of Advanced Mechanical Test Techniques for Severe Environment Performance Evaluation of Fusion Materials.....	234
§7.	Progress in MHD Coatings Fabrication by RF Sputtering Method .....	235
§8.	Radiation Effects on Ceramic Insulation Materials for Liquid Li Self-Cooled Blanket System .....	236
§9.	Effect of Crack Existence in Coating Layer on MHD Pressure Drop .....	237
§10.	Nernst-Seebeck Element in High Magnetic Field.....	238
(2)	Helical Reactor Design.....	239
§1.	Study of the Plasma Physics Issues in the Burning Plasma in Helical Reactors.....	240
§2.	Long-Life Flibe Blanket Design for the LHD-Type Reactor FFHR.....	241
§3.	A Design Study on Recovery of Tritium from Molten Salt Flibe Blanket of Fusion Reactor .....	242
§4.	Development of Heat Transfer Enhancement Technique in High Pr Number Fluid Blanket.....	243
§5.	Study on Advanced Thermo-Fluid System for a Helical Reactor.....	244
§6.	Study on Thermo-Fluid Behavior of Turbulent MHD Flows in a Liquid Blanket .....	245
§7.	Design Study on Heat Exchange System for Liquid Blanket Fusion Reactor .....	246
§8.	Scale Effects on Magnet Systems of Heliotron-Type Reactors .....	247
§9.	Effect of Surface Condition on Jointing Performance in HTc SC Tape .....	248
§10.	Upgrade and Benchmarking of the NIFS Physics-Engineering-Cost Code..	249
§11.	Transport Projections of LHD-Type Helical Reactor Plasmas .....	250
§12.	Design and Evaluation of the First Wall of Fusion Reactor Exposed with High Heat- and Particle-Flux .....	251
§13.	CHF's of Subcooled Water Flow Boiling against Inlet Subcooling for High $L/d$ Region.....	252
(3)	Fusion Reactor System and Safety .....	253
§1.	Investigation of Tritium Behavior and Tracability in Inversed Systems of LHD during D-D Burning.....	254
§2.	Studies of Interaction between Cooling Pipe Materials and Tritium, and Their Chemical Behavior .....	255
§3.	Development of Water Detritiation System Using Combined Electrolysis Catalytic Exchange under Reduced Pressure.....	256

§4.	Experimental Analysis of Hydrogen Adsorption for Isotope Separation/ Purification by Pressure Swing Adsorption .....	257
§5.	Development of Advanced Catalyst for Oxidation of Tritium and Quantification of Mass Transfer Coefficient.....	258
§6.	Performance Analysis of Tritium Cleanup System Based on Computer Simulation .....	259
§7.	Improvement of Hydrogen Analyzer with Trace Reduction Detector.....	260
3.	CHS Experiments.....	261
§1.	Profile Characteristic of Edge Transport Barrier on CHS.....	262
§2.	NB Power Dependence on Formation of Edge Transport Barrier in Compact Helical System .....	263
§3.	Study on Confinement Improvement by Edge Transport Barrier with Use of HCN Laser Interferometer on CHS .....	264
§4.	Edge Transport Barrier in CHS Measured Using Beam Emission Spectroscopy .....	265
§5.	Edge Density Profile Measurement of ETB Plasma by Lithium Beam Probe .....	266
§6.	Plasma Boundary Condition for Edge Transport Barrier Formation .....	267
§7.	Optimization of EC Heating Location for N-ITB Formation of EC Heated NBI Plasma .....	268
§8.	Dependence of Magnetic Field Structure on Formation of N-ITB .....	269
§9.	Achievement of Higher Plasma Stored Energy by 106GHz ECH Power Injection to High-Density NBI Plasmas.....	270
§10.	Study on Collisional Ripple Transport of Neutral Beam-Injected Energetic Ions in CHS.....	271
§11.	Loss Cone Boundary Measurement Using Diagnostic Neutral Beam and Neutral Particle Analyzer in CHS .....	272
§12.	Second-Harmonic ECCD Experiments on CHS .....	273
§13.	Zonal Flow Identification in CHS .....	274
§14.	Fluctuation Measurements of NBI-ECH Plasma with HIBP on CHS .....	275
§15.	The Trial Measurement of Density Profile with Heavy Ion Beam Probe System in CHS .....	276
§16.	Simultaneous Measurements of Density and Potential Fluctuation with Heavy Ion Beam Probe in CHS .....	277
§17.	Development of Multichannel HCN Laser Interferometer on CHS .....	278
§18.	Measurements of Electron Density Fluctuations in CHS Plasmas by Using YAG Laser Imaging Method .....	279
§19.	Two-Dimensional Lithium Beam Probe for Edge Plasma Diagnostic .....	280
§20.	Formation of Internal Transport Barrier in Dimensionally Similar Low Temperature Plasmas Produced at Very Low Toroidal Field.....	281
§21.	Electrostatic Fluctuations in a Dimensionally Similar Low Temperature Plasma with Internal Transport Barrier.....	282
§22.	Production of Over Dense Plasma by Launching of 2.45GHz ECW on CHS .....	283
§23.	Production of Strong Electric Field and Electron Confinement by Electron Injection into Helical System through Stochastic Region.....	284
§24.	Investigation of Collisionless Electron Penetration via the Stochastic Magnetic Region on CHS .....	285
§25.	Extreme Ultraviolet Spectroscopy of CHS Plasma for Use in Detailed Atomic Modeling .....	286
§26.	Whistler Wave Plasma Production in CHS.....	287

§27.	16-Channel ECE System for Continuous Electron Temperature Measurement on CHS .....	288
§28.	LiBP Imaging Using CCD Camera.....	289
§29.	Design of Filtered AXUV Photodiode Arrays for Impurity Profile Measurement in CHS Plasma.....	290
§30.	HCN Laser Scattering Measurement on CHS.....	291
§31.	Installation of Multi-Purpose Probe in CHS .....	292
§32.	Radial Electric Field Control by Electron Injection in CHS .....	293
§33.	Impurity Transport in the CHS Plasma with Internal Transport Barrier .....	294
§34.	Development of Laser-Induced Fluorescence-Dip Spectroscopy of Argon for Sensitive Measurements of Electric Fields in Plasmas .....	295
§35.	Development of Data Acquisition System in CHSNBI.....	296
§36.	CHS Data Acquisition and Analysis System .....	297
4.	Basic Research and Development.....	298
§1.	High Density Plasma Experiment Using HYPER-I.....	300
§2.	2D Potential Profile and Quasi-Neutrality Breaking of Plasma Hole .....	301
§3.	Measurement of Supersonic Flow Velocity with Directional Langmuir Probe .....	302
§4.	Magnetic Fluctuation in High Density Plasma with Flow in the HYPER-I Device .....	303
§5.	Reconstructed Temporal Evolution of Neutral Particle Distribution with CT-Method Using Visible-Light Radiation .....	304
§6.	Development of Measurement System of Impurity Distribution in Divertor Region .....	305
§7.	Effect of Gas Species on the Macroscopic Oscillations of Detach Plasma in the TPD-II .....	306
§8.	Development of a Supersonic Beam Source for Rapid Plasma Cooling .....	307
§9.	The Charge Exchange Processes of Excited Atoms II.....	308
§10.	Isomer Effect on Charge Transfer by Slow Ions from Hydrocarbon Molecules .....	309
§11.	Measurement of Angular Resolved Energy Distribution Function of Particles Reflected at Refractory Metal Surface .....	310
§12.	Dependence of H <sup>-</sup> Extraction Probability on Gas Pressure and Filter Magnetic Field in a Volume-Type Negative Ion Source .....	311
§13.	Ion Heating Experiment in a Supersonic Plasma Flow Passing Through a Magnetic Nozzle .....	312
§14.	Application of Wave Momentum to a Nonneutral Plasma and its Contribution to Transport.....	313
§15.	Study on Control of Bifurcated Transition in Magnetized Plasma.....	314
§16.	Basic Process of Solid Hydrogen Ablation by Plasma .....	315
§17.	Correlation between Magnetic Field Configuration and Density Profile in Merged Compact Toroid .....	316
§18.	A Basic Study on An Intensive Energetic Plasma Beam.....	317
§19.	Orbit Topology and Confinement of Neutral-Beam Injected Beam Ions in Quasi-Axisymmetric System .....	318
§20.	Effects of Current Profile on Global Ideal MHD Stability in a Compact Quasi-Axisymmetric Stellarator.....	319
§21.	On Analytical Expressions for Bootstrap Current Coefficients Applicable to Advanced Helical Devices .....	320
§22.	Dependence of Magnetic Well on the Aspect Ratio for Stellarators and Tokamaks .....	321

§23.	The Effect of Coil Misalignment on Particle Transport in Quasi-Axisymmetric Systems.....	322
§24.	Engineering Study for Physics Experiments in Quasi-Axisymmetric Stellarator with Low Aspect Ratio.....	323
5.	Theory and Computer Simulation Center.....	324
§1.	Relation between the Radial Electric Field and the Flow in a Torus with $\nabla T = 0$ .....	325
§2.	Neoclassical Transport Simulation by $\delta f$ Monte-Carlo Method.....	326
§3.	Development of a Toroidal ITG Simulation Code for a Flux Tube Geometry.....	327
§4.	Vlasov and Drift Kinetic Simulation Method Based on the Symplectic Integrator.....	328
§5.	Velocity-Space Structures of Distribution Function Associated with the Zonal Flow in a Tokamak.....	329
§6.	Comparison of Linear Growth Rate of Multiple Drift Wave Instabilities at $k_{\theta} \rho_{th} \sim 1$ .....	330
§7.	Electrostatic Drift Waves in an LHD Configuration and a Comparable Aspect Ratio Tokamak.....	331
§8.	Kinetic Ballooning Modes and Their Correspondence to Ideal MHD Modes in an LHD Plasma.....	332
§9.	Short Wavelength ITG Modes with Toroidal and Trapped Particle Effects.....	333
§10.	MHD Direct Numerical Simulations of LHD with 3.6m Vacuum Magnetic Axis.....	334
§11.	Properties of Compressible Pressure-Driven Modes in Inward-Shifted LHD Configurations.....	335
§12.	Development of the New HINT Code: HINT2.....	336
§13.	Three Dimensional MHD Equilibrium with an Anisotropic Pressure Profile.....	337
§14.	Boundary Modulation Effects on MHD Instabilities in Heliotrons.....	338
§15.	Development of Nonlinear Simulation Code for External MHD Instabilities.....	339
§16.	Nonlinear Simulation of Resistive Wall Modes with Rigid Poloidal Rotation.....	340
§17.	Nonlinear Simulation of External Kink Modes with Density Evolution.....	341
§18.	Stability Analysis of Ideal External Modes with the Property of Newcomb Equation in Tokamaks.....	342
§19.	Nonlinear Simulation of Neoclassical Tearing Mode.....	343
§20.	Discretization of Shear Alfvén Continua.....	344
§21.	Energetic Ion Transport due to Alfvén Eigenmode Bursts.....	345
§22.	Frequency Sweeping of to Alfvén Eigenmode in a JT-60U Plasma.....	346
§23.	Computer Simulation of Fishbone Oscillation.....	347
§24.	Strike Point Pattern on Local Island Divertor Head.....	348
§25.	Edge Plasma Simulations for Stellarator by Use of SET.....	349
§26.	Simple Core-SOL-Divertor Model to Investigate Plasma Operational Space.....	350
§27.	Steady Collisionless Reconnection and Anomalous Resistivity in a Three-Dimensional Open System.....	351
§28.	Two-Scale Structure of the Current Layer Controlled by Meandering Motion during Steady-State Collisionless Driven Reconnection.....	352
§29.	Generation of Langmuir Turbulence by Intensive Relativistic Electron Beam Injection in an Open Plasma System.....	353
§30.	Non-Taylor Relaxation of MHD Plasma in Cylindrical System.....	354

§31. Simulation Study of the Solar Flare Triggering Mechanism .....	355
§32. Simulation Study of Dynamo Process Driven by Magnetorotational Instability.....	356
§33. Simulation Study on the Magnetic Helicity Transfer in the Magnetospheric System .....	357
§34. Analytical Formula of the Thermal Conductivity due to Given Electrostatic and Electromagnetic Fluctuations-1.....	358
§35. Analytical Formula of the Thermal Conductivity due to Given Electrostatic and Electromagnetic Fluctuations-2.....	359
§36. Analytical Formula of the Thermal Conductivity due to Given Electrostatic and Electromagnetic Fluctuations-3.....	360
§37. Supramolecule Structure for Amphiphilic Molecule by Dissipative Particle Dynamics Simulation .....	361
§38. Molecular Dynamics Simulation for Structure Formation of a Single Polymer Chain in Solution.....	362
§39. Behaviors of Fine Particles in Plasmas .....	363
§40. Low-Frequency Instabilities Due to Flow Velocity Shear in Magnetized Plasmas.....	364
§41. Reduction of Sheath Potential and Particle Flux at a Target Plate by Negatively Charged Dust Particles .....	365
§42. Stationary Potential Formation and Oscillations in Plasma with Immovable Dust Particles .....	366
§43. On Dust Dynamics in Tokamak Edge Plasmas.....	367
§44. Statics of a Dust Particle in Sheaths and at Walls.....	368
§45. Dynamics of a Dust Particle in Sheaths .....	369
§46. Research on High Energy Density Plasma Physics with Peta Watt Laser....	370
§47. Acceleration of High-Quality, Well-Collimated Return Beam of Relativistic Electrons by Intense Laser Interacting with Under-Dense Plasma .....	371
§48. Stimulated Electron Acoustic Wave Scattering of Laser Light in a Two-Electron-Temperature Plasma .....	372
§49. Collisionless Shock Waves and Particle Acceleration.....	373
§50. Positron Acceleration by an Oblique Magnetosonic Shock Wave in an Electron-Positron-Ion Plasma .....	374
§51. Particle Pair Diffusion in Turbulence .....	375
§52. Orthonormal Divergence-Free Wavelet Analysis of PDF of Turbulent Velocity Field.....	376
§53. Evolution Mechanism of Streamwise Vortices in Plane Couette Turbulence.....	377
§54. Study on Nonequilibrium Statistical Mechanics of NS and MHD Turbulence by Using Massive DNS.....	378
§55. Response and Stability of MHD and NS Turbulences.....	379
§56. Development of Non-Hydrostatic Ocean Circulation Simulation Code.....	380
§57. Interaction between a Columnar Vortex and External Turbulence.....	381
§58. Networked Virtual Reality System for Collaborating with Remote Sites ....	382
§59. Visualization of Complex Systems Using Virtual Reality Technology.....	383
§60. Conversion of OpenMP Benchmark Programs into HPF and Evaluation of Parallel Performance .....	384
§61. Development of Simulation Code on Open System in Parallel Computing Method .....	385
§62. Improvement of Calculation Efficiency of Simulation Code on Open System .....	386

§63.	Benchmark Test Using New Reduced Grid .....	387
§64.	Study on MHD Wall Shear Turbulent Flow on High Reynolds Number via Paralleled Direct Numerical Simulation .....	388
6.	Personal Interchange Joint Research Program .....	389
§1.	Theory and Simulation Researches on Laser Fusion Plasmas .....	391
§2.	Statistical Theory for Transition and Long-Time Sustainment of Improved Confinement State .....	392
§3.	Development of Cryostat for Fast Ignition Experiments .....	393
§4.	Optimization of Helical System Concept.....	394
§5.	Laser and Plasma Diagnostics.....	395
§6.	Study for the Steady State Operation of Spherical Tokamaks .....	396
§7.	Steady State Hydrogen Plasma Interactions with Solid and Liquid Lithium in Vehicle-1 .....	397
§8.	ECH Plasma Experiments of Levitated Internal Coil Device Mini-RT.....	398
7.	Collaborations Using Super SINET .....	399
§1.	Reconstruction of Network for LHD Experiment Remote Participation System.....	400
§2.	Remote Experiments on Measurement of Edge Plasma Fluctuation in LHD with Super SINET.....	401
§3.	Millimeter-Wave Remote Experiment System Using Super-SINET.....	402
§4.	Remote Participation for the Plasma Experiment with the Levitated Superconductor Coil by Use of SuperSINET System.....	403
8.	Data and Planning Center.....	404
§1.	Atomic and Molecular Data Compilation and Update of the NIFS Databases.....	406
§2.	Study of Evolutional Data Collecting System for the Atomic and Molecular Databases.....	407
§3.	Electron Capture in Collisions of $H^+$ and $O^+$ Ions with $H_2$ , $D_2$ and Hydrocarbons and Other Fusion Relevant molecules below a Few-keV Regime .....	408
§4.	Dielectronic Recombination Rate Coefficients to Excited States of Boronlike Oxygen and Dielectronic Satellite Lines.....	409
§5.	Cross Section Database for $Li^{3+}$ Colliding with H Atoms.....	410
§6.	Atomic Data Evaluation and Data Fitting .....	411
§7.	Search for Atomic and Molecular Databases Related to Plasma Processing Gases .....	412
§8.	Excited-State Abundance in Hydrogen Atoms Coming Out of Refractory Metal Surfaces.....	413
§9.	Spectroscopic Diagnostics in Boundary Plasmas .....	414
§10.	Study of Impurity Ion Radiation Intensity in the GAMMA 10 Plasma.....	415
§11.	Satellite Lines and $Ly_\alpha$ of H-Like Mg Ions from Laser Produced Plasma ...	416
§12.	Theoretical Calculations for Spectra of $Xe^{10+}$ Ions .....	417
§13.	Collisional Radiative Model for $Xe^{10+}$ Ions and the Contribution of Satellite Lines on EUV Spectra.....	418
§14.	EUV Spectra of $Xe^{10+}$ Ions Measured from LHD .....	419
§15.	EUV Wavelength Calibration for SOXMOS Spectrometer.....	420
§16.	Computer Tools for Simulation of Plasma Dynamics .....	421
§17.	Hydrogen Fuel-Pellet Ablation in LHD Plasma .....	422
§18.	Steady State Hydrogen Plasma Interactions with Solid and Liquid Lithium in Vehicle-1 .....	423
§19.	First-Principle (Ab Initio) Molecular Dynamics Simulations of Proton Transfer Phenomenon in Ion Liquid .....	424

§20.	Molecular Dynamics Simulation of Strongly Coulomb Coupled System: Effects of Salt and Polymer Ions on the Charge Inversion .....	425
§21.	Archival Studies on the Nuclear Fusion Research at Universities in Japan (I) –NIFS Nuclear Fusion Archives Database– .....	426
§22.	Archival Studies on the Nuclear Fusion Research at Universities in Japan (II) –NIFS Nuclear Fusion Archives Chronology–.....	427
§23.	Archival Studies on the Nuclear Fusion Research at Universities in Japan (III) –Presentations at Other Academic Societies– .....	428
9.	Fusion Engineering Research Center .....	429
§1.	Improvement of Vanadium Alloys by Precipitate Control for Structural Components of Fusion Reactors .....	430
§2.	Installation and Performance Test Results of Cryogenic Irradiation Facility of 14 MeV Neutron.....	431
§3.	Impact Properties of NIFS-HEAT-2 (V-4Cr-4Ti) after YAG Laser Welding and Neutron Irradiation at 563 K .....	432
§4.	Fabrication of Erbium Oxide Coatings by Arc-Source Plasma Sputtering Device for Vanadium-Lithium Blanket System.....	433
§5.	Fabrication of V-Based Laves Phase Compound Superconductor Synthesized by a Rapidly-Heating and Quenching Process .....	434
§6.	Investigation of Tritium Self-Sufficiency for FFHR2 Design with Liquid Li Self-Cooled Blanket System.....	435
§7.	The Characteristics and Stability of In-situ Erbium Oxide Coating on Vanadium Alloy .....	436
§8.	Dynamic Strain Aging Phenomenon Observed in Low Cycle Fatigue Behavior of JLF-1 at 673K .....	437
§9.	14MeV Neutron Detection System Utilizing Radioluminescence and Optical Fiber.....	438
§10.	Deuterium and Helium Retentions of V-4Cr-4Ti Alloy for First Wall of Breeding Blanket.....	439
§11.	Experimental Study on Liquid Lithium Flow for IFMIF Target .....	440
§12.	Control of Nitrogen Concentration in Liquid Lithium by Fe-Ti Alloy.....	441
§13.	An Experimental Study to Recover Tritium by Y Metal from IFMIF Li Loop .....	442
§14.	Present Status of Design Activity of IFMIF HFTM .....	443
§15.	Small Specimen Test Techniques –Fracture Toughness (CT)–.....	444
§16.	Evaluation of Fracture Toughness and Tensile Properties of Reduced Activation Materials with Miniaturized Specimen .....	445
§17.	Experimental Studies on the Neutron Emission Spectra and Activation Cross-Section in IFMIF Accelerator Structural Elements .....	446
10.	Safety and Environmental Research Center.....	447
§1.	Report of Operational Results of an Access Control System Developed for LHD Controlled Area.....	448
§2.	Analysis of Burst Radiation from CHS Using Monitoring Data .....	449
§3.	Design of a Multi-Layer-Type Neutron Monitor for Measuring Dose of Three Energy Groups .....	450
§4.	Proposal for a Portable Directional Neutron Source Finder .....	451
§5.	A Simplified Method for Tritium Measurement in the Environmental Water Samples .....	452
§6.	Study on Measurement Technique of Atmospheric Tritium for Different Chemical Forms .....	453

§7.	Development of an Environmental Atmospheric Tritium Monitoring System with Automatic Discriminate Sampling of Different Chemical Forms.....	454
§8.	Development of Proportional Counter to Measure the Tritium in the Air....	455
§9.	Development of Exhaust Gas and Effluent Liquid Treatment System for LHD.....	456
§10.	Study on Separation of Hydrogen Isotopes Using Vycor Glass Tube .....	457
§11.	Research on Oxidation Factors of Molecular Tritium and Fluctuation Factors of Tritium Level in the Environment .....	458
§12.	Quantification and Safety Evaluation of Human Exposure to Stochastically Varying EM Fields.....	459
§13.	Measurements of Static and ELF Magnetic Fields in a Large Plasma Experimental Facility .....	460
11.	Computer Center .....	461
III.	International Collaboration .....	465
1.	US – Japan (Universities) Fusion Cooperation Program .....	467
2.	TEXTOR Collaboration .....	470
3.	International Collaboration on Helical Fusion Research – IEA Stellarator Agreement – ..	472
4.	JSPS-CAS Core-University Program on Plasma and Fusion .....	480
IV.	Department of Engineering and Technical Services.....	487
V.	Department of Administration .....	501
APPENDIX 1.	Organization of the Institute.....	504
APPENDIX 2.	Members of Committees .....	505
APPENDIX 3.	List of Staff .....	506
APPENDIX 4.	List of Publications I (NIFS Series).....	511
APPENDIX 5.	List of Publication II (Journals, etc.).....	514
Author Index .....		524
How to Reach National Institute for Fusion Science.....		532
